The Cost Sharing Sidewalk Replacement Program was established to help keep the Community sidewalks safe, in proper working order, and keep the Community revitalized.

The City of Waverly will cost share up to 50% with property owners to replace poor quality public sidewalks within the right of way. \$5000 is budgeted for this program annually.

**Example:** Cost to replace 5 sidewalk panels on a property is \$500. City will pay \$250. Property owner will pay \$250.

The City will obtain estimates and will hire the contractor to replace the sidewalks. The City will pay for the total cost up front and the property owner will be required to reimburse the City for the property owner's share.

Once the applications are received, the Building Official will review the applications and inspect the applicant's sidewalk. If there are more sidewalk applications submitted that exceed the available funds, then the sidewalks will be replaced, or prioritized, contingent upon their condition, with the worst sidewalks being replaced first.
